# Veekay AI Product Website Blueprint (Version 1)

## Vision

Build a living AI Product Management platform—not just a portfolio. The website should demonstrate product thinking, AI capability, leadership, continuous learning, and business impact.

## Core Experiences

1. Explore: Resume, experience, projects, case studies, demos.
2. Learn: Medium, Substack, LinkedIn articles, PMOS Knowledge Hub.
3. Ask: AI assistant trained on resume, LinkedIn, GitHub, PRDs, articles, demos and architecture.

## Homepage

Hero with tagline and CTAs (View Projects, Read Articles, Ask AI About Me). Three impact metrics (19+ Years, 10,000+ Users, 35% Efficiency). Featured projects. Latest writing. AI Assistant section. Knowledge Hub preview.

## Navigation

Home, About, Projects, Articles, Knowledge Hub, Journey, AI Assistant, Resume, Contact.

## Projects

Each project includes Overview, Business Problem, Solution, Demo, Architecture, Evaluation, Business Impact, Lessons Learned, Roadmap. Progressive disclosure for GitHub, PRD, datasets, prompts, technical docs.

## Knowledge Hub

Product Management, AI PM, LLMs, Prompt Engineering, Evaluation, RAG, Agents, Responsible AI, Leadership, Interview Prep, Templates, Case Studies.

## AI Assistant

Answers questions about experience, healthcare AI, leadership, projects, architecture, evaluation framework, articles, GitHub, current work and recommendations.

## Current Progress

Now Building section with progress bars, Public Roadmap (Completed/In Progress/Coming Soon), Weekly Build Log, Recent Activity feed, Quarterly Goals, Builder's Journal.

## Content Sources

Resume, LinkedIn, Medium, Substack, LinkedIn posts, GitHub repos, PRDs, architecture diagrams, videos, PMOS documentation.

## UX Principles

Minimal homepage, lots of whitespace, one primary CTA per section, progressive disclosure, deep content only when requested.

## Future

Recruiter Mode, Learning Paths, Interactive AI Playground, Architecture Gallery, Open-source resources, Speaking, Book, Community.
